

Srinivasa - Senior Software Engineer Portfolio

Email: srinivasa@example.com | GitHub: github.com/srinivasa

Professional Summary

Innovative and results-driven Senior Software Engineer with over 8 years of experience designing and building scalable enterprise applications. Specialist in Artificial Intelligence, Retrieval-Augmented Generation (RAG) pipelines, distributed vector databases, and full-stack Python development. Proven track record of optimizing search latency and improving LLM response accuracy.

Key Projects

1. AI Resume Screener

Developed an autonomous AI resume screening application leveraging LangChain, FastAPI, and ChromaDB. The system processes multi-format resumes, extracts relevant skills, and ranks candidates against job descriptions. Reduced screening time by 75% while maintaining a 92% match accuracy rate.

2. Distributed Vector Search Optimization

Architected a custom caching layer on top of a vector database cluster, improving query throughput by 40%. Implemented hybrid search algorithms combining keyword-based BM25 search with dense vector embeddings to deliver highly relevant, contextual documentation results.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Go

AI/ML & RAG: LangChain, LlamaIndex, ChromaDB, Pinecone, HuggingFace, OpenAI API

Frameworks: FastAPI, Streamlit, Django, React, Next.js

Tools & DevOps: Docker, Kubernetes, Git, GitHub Actions, AWS, PostgreSQL

Education

Bachelor of Technology in Computer Science & Engineering

State University | Graduated with Honors
